SUMMARY

Full-Stack Developer with hands-on experience in TypeScript, JavaScript, React.js, Node.js, and Express.js, building secure and scalable web applications. Skilled in OAuth2, JWT, REST APIs, PostgreSQL, and MongoDB, with a strong focus on performance, reliability, and clean architecture. Seeking a Software Engineer role to contribute across frontend and backend development.

SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, OAuth2, JWT

Databases/ORM: PostgreSQL, MongoDB, Drizzle ORM, Mongoose

Tools & Platform: Git, GitHub, Vercel, Render, Netlify

PROJECTS

Snippy: URL Shortener & Analytics Platform |  [Live](#) | *Node.js, Express.js, EJS, MongoDB*

- Built a full-stack URL shortener that converts long links into clean, shareable short links generated instantly on submission.
- Implemented secure user accounts with authentication, keeping every shortened link tied to its owner.
- Added per-link click analytics with timestamps so users can track how their links perform over time.
- Designed a personal dashboard listing all links created by a user along with live click counts.
- Built an admin control panel giving admins visibility into every link created across the platform.
- Ensured reliable, low-latency redirects from short links to their original destination URLs.

Blogify: Blogging Platform | *Node.js, Express.js, EJS, MongoDB*

- Building a full-stack blogging platform using the same Node.js/Express/EJS backend architecture as Snippy.
- Designing features for creating, editing, and publishing posts with server-rendered EJS views.
- Implementing user authentication so authors can manage their own posts securely.
- Structuring backend routes and models for posts, categories, and comments.

Library Management System | *React.js, Node.js, Express.js, MongoDB*

- Building a library management system with a React.js frontend and the same backend stack used in Snippy.
- Designing modules for book search, cataloguing, and tracking issue/return status.
- Implementing role-based access so librarians and members see different views and permissions.
- Connecting the React frontend to REST APIs for real-time updates on book availability.

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS) – Third Year
BGPS College, Mumbai
